

What is erosion?

By Carlos mota

Erosion is the wearing away and reshaping of the earth. It can happen quickly or slowly

What causes erosion

Laakea

Wind causes erosion by blowing sand and rocks the sand breaks off peices of rock.

Water causes erosion by water crashes into cliffs and it turns into a bay.

Ice can cause erosion by ice gets in a big group and slide down the land .

Austin

FAST PROCESS

**THIS KIND OF CHANGE TAKES A SHORT TIME LIKE A FEW MOMENTS
OR A FEW DAYS**

SLOW PROCESS

**SLOW PROCESS TAKES A LONG TIME LIKE
MILLIONS OF YEARS.**

CANYON EROSION

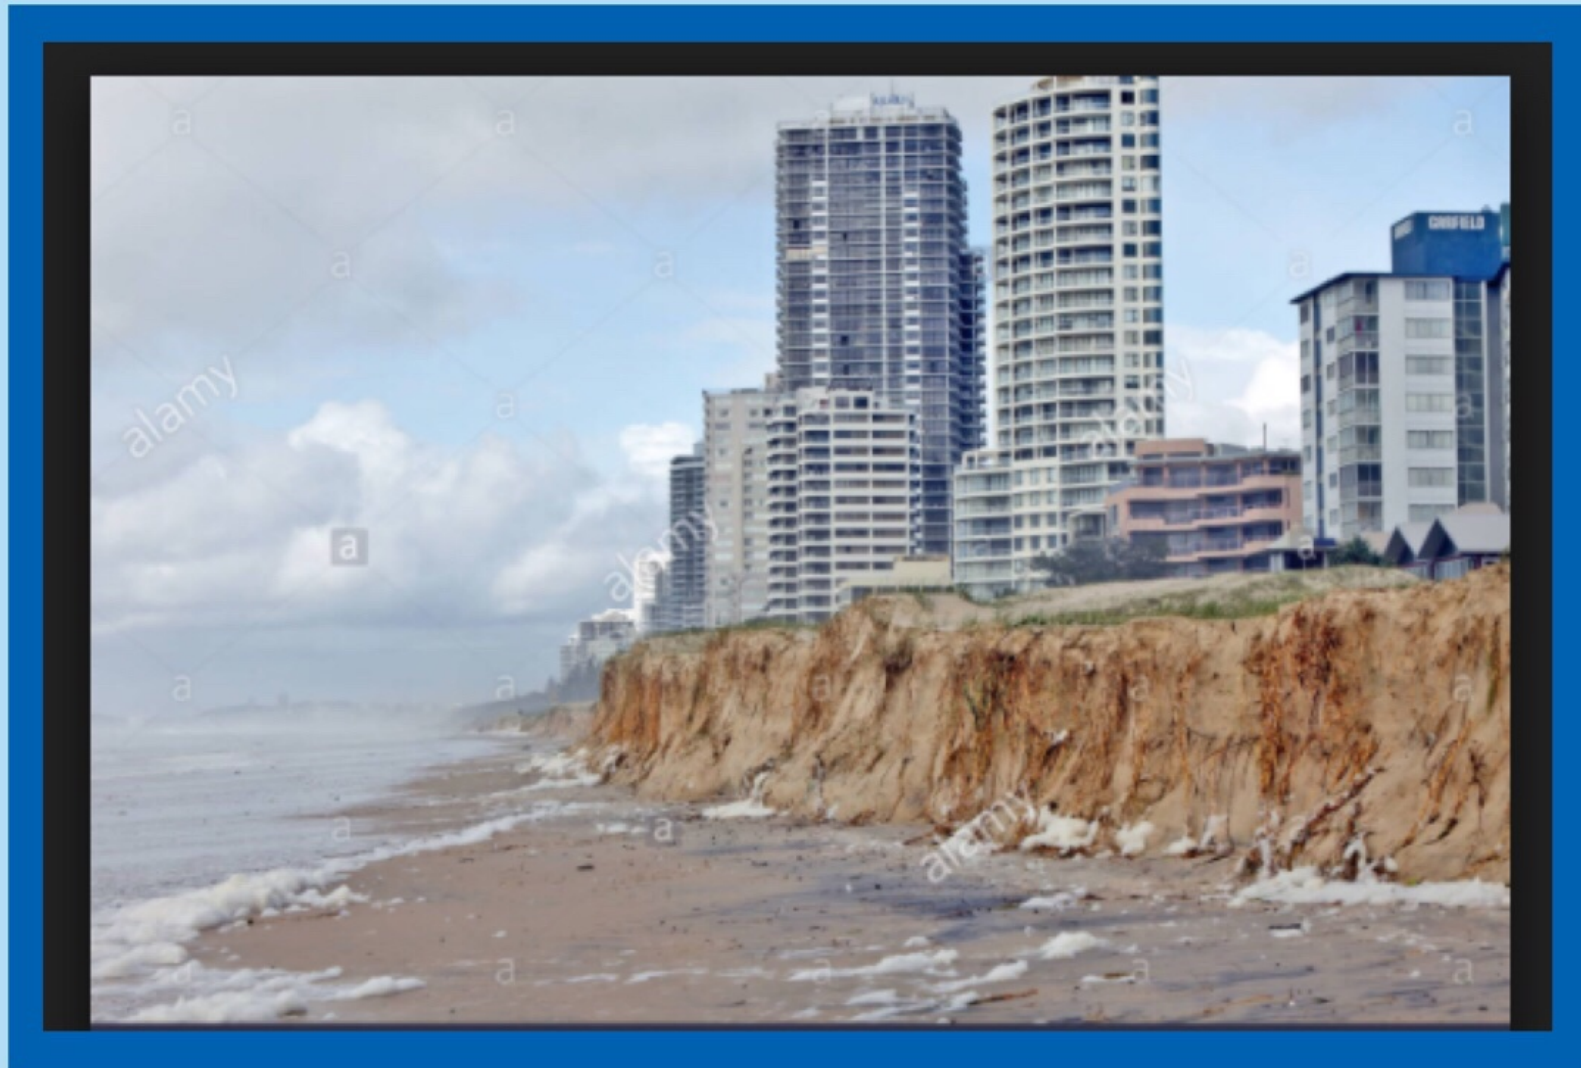

***THIS IS A SLOW PROCESS. RIVERS
CARVE OUT CANYONS***

COASTAL EROSION

THIS IS ANOTHER EXAMPLE OF A SLOW PROCESS. MOVING WAVES CAUSES THIS KIND OF EROSION

How is erosion affecting Hawaii's beaches and local people?

**The waves are taking away sand from the beach so it is disappearing.
It affects people by houses near the beach can erode away.**

By Carlos mota

What are solutions of an erosion?

There is no best solution because all of the solutions have pros and cons.
